

Excellence in Color

Dry-Chroma Color[®]

Overview

Dustless black Dry-Chroma Color[®] is a colorant and additive system that is supplied in powder form for cost effective coloring. This new product innovation from the Chroma Rotational Molding Division reduces the dusting associated with the use of conventional black dry color.

Dustless black Dry-Chroma Color[®] is available in bulk or in units that are pre-weighed and packaged for your convenience and to further reduce the potential of dust and handling in production.

This value added Dry-Chroma Color[®] product will provide a cleaner plant environment, improved product quality and minimize down time when changing colors.

Please contact Chroma's Customer Support Department for additional information.
