

Technical Resins

Overview

Chroma development efforts have led to capabilities on formulating alternate engineering resins or other types of resins for rotational molding. The Research and Development Center continues to develop and promote alternate resins that offer value added choices.

| Possible Resins | Properties |
|---------------------|--------------------------------|
| Polyester copolymer | Tough flexible product |
| EVA | Elasticity and good processing |
| ABS | Paintable, plateable |
| Acetal | Strong engineering resin |
| Polycarbonate | Clear engineering resin |
| Cellulosics | Clear common resin |
| UV15 Polyethylene | For outdoor use |
| Nylon | Family of engineering resins |
| Specialized resins | |
